

Brief Substance Craving Scale Results with Opiate Addicted Patients

The following results were achieved by obtaining subjective data from the patients treated at Springfield Wellness Center for opiate addiction using BR+. Patients were asked to complete a scale, rating the intensity, frequency and length of their Cravings (consuming desire to use). Ratings were then scored on a scale of 0 to 12 (0 meaning no cravings; 12 meaning the patient was experiencing severe cravings).

Pt. ID #	Day 1	Day 5	Last Day of Tx	Notes
143	8	4	1	8 days of treatment
